

Adam Wharton

Key Metrics	No.	Percentile
XAG/90	0.29	99
SCA/ 90	3.77	95
INT/90		79
Prog. Pass/90		74
ETC. basic FBREF/Opta data used to create profile		
Comp %	74.6%	7

Player Profile

Wharton stands out in passing metrics related to progression, chance creation, and long passing. These stats along with his low completion rate and attempts indicates that he is a passer who frequently attempts high risk, high reward passes rather than recycling. Defensively, he is proficient at stats relating to reading the game and stepping up aggressively but at or below average in physicality and dueling

Profile Fits

Dataset information: minutes, league, year etc					
Player Name	Difficult Pass %	Xpass/90	Xthreat passing	Def Metric 1	Other Metric
Léo Sena	10%	1.5	ETC. Numbers color coded by percentile. Some sort of team style adjustment		
Player 2	45%	0.9			
Player 3	27%	1.7			
Player 4	50%	0.2			

Best Player Fit (Likely Sena)

Radar chart goes here

More expanded data table here
Types of passes breakdown, something else, idk
Maybe some sort of style of play mitigation thing

Pass map with xpass (better formatting)
